

WCC 2022

12th International Workshop on Coding and Cryptography

University of Rostock, Germany

March 7-11, 2022

Invited Speakers:

Faruk Göloğlu

Charles University,
Prague, Czech Rep.

Markus Grassl

International Centre for Theory of Quantum Technologies,
University Gdansk, Poland

María Naya-Plasencia

INRIA,
Paris, France

Lisa Sauermann

Massachusetts Institute of Technology,
USA

Antonia Wachter-Zeh

Technical University of Munich,
Germany

Deadline for submission
of extended abstracts before:
September 30, 2021

Conference Topics include:

Coding theory: error-correcting codes, decoding algorithms,
quantum codes, related combinatorial problems

Algorithmic and theoretical aspects of cryptology: symmetric cryptology,
public-key cryptography, cryptanalysis, quantum cryptography

Discrete mathematics and algorithmic tools related to these two areas,
such as: Boolean functions, sequences, finite fields, finite geometry,
related algebraic systems

Organizers:

Gohar Kyureghyan (University of Rostock, Germany)

Leo Perrin (INRIA, Paris, France)

Alexander Pott (Otto von Guericke University Magdeburg, Germany)
